

POOL MIX[®]

Pool Mix[®] Ground Calcium Carbonate - is the leading white ground marble aggregate for swimming pools. For lasting beauty and the aesthetic effect of dazzling blue water, Pool Mix is unmatched.

Pool Mix works well for pool builders and end customers.

- Easy to apply with a hand trowel
- Makes a hard, smooth finish - no paint required
- Less abrasive on plastering equipment
- Resists staining and cracking
- Easy to clean and keep clean
- Aesthetically pleasing with surrounding stone or brick

Typical Properties

Source	Sahuarita, AZ	Whitestone, GA
CaCO ₃ (%)	95	82+
Acid Insolubles (%)	3	3
SiO ₂ (%)	2	1.5
Moisture (%)	0.15	0.15
Plus 200 Mesh (%)	80	80
Plus 8 Mesh (%)	0	0
Hardness (Mohs)	3	3
Index of Refraction	1.6	1.6
Specific Gravity	2.7	2.7
Solid Density (lb/gal)	22.7	22.7
Bulk Density (lb/ft ³)		
- Loose	90	90
- Packed	110	110

Pool Mix is simply mixed with white Portland cement, and water is added to create the right plasticity.

The plaster should be trowelled onto the rough concrete base to a thickness of about 3/8". Concrete must be green to assure the proper bond for the plaster.

Pool Mix is available in 100lb heavy-duty paper or plastic bags. Mixing 1 to 2 bags with 1 bag of Portland cement makes enough plaster to cover 50 sq. ft. to a thickness of 1/4" to 3/8".
